Aluminum Log Stake

Stronger than existing aluminum log stakes

50%+ Stronger than 4x3x1/4" steel stakes

Lighter Weight

Available in 9'6" and 7'5"

Unique No Web Design

Introducing *DURASTAKE* aluminum log stakes.

Seeing the need for a better, more durable aluminum log stake, U.P. Truck Center began development in mid 2006. Together with an outside engineering firm, the DURASTAKE was designed and developed nearly a full year later. DURASTAKE was engineered and tested to be 50%+ stronger than steel stakes and stronger than other aluminum stakes. The web free center and strategic increases in thickness allow for better wear and significantly reduces fracture points. Since 1985 U.P. Truck Center, Inc. has been tuned in to the wants and needs of the logging industry, DURASTAKE is destined to become another successful product.

If you would like more information about DURASTAKE aluminum stakes please contact our parts department for assistance.
